

A New Way to Book Travel

Atlanta, GA, April 30, 2007 – Planning a trip or an event for a group of people can be a nightmare. From juggling schedules, varying inventory, roommate shuffling, to accounting dilemmas, it typically adds up to one big headache. With that in mind, we turn to an established, renowned web design company, Weblogix, a company that has changed the way group travel is booked forever.

TravelLogix, the latest product offering from Weblogix, is an online reservation system that allows anyone to easily book a room on a trip OR a ticket for an event. After months of consulting with several travel planners, Weblogix has built an online booking engine that revolutionizes the complex reservation process for trips and events for any just anyone in the industry. “Registration is the easy part”, says President Sean Hynes, “it’s the the trip costing, membership management, and remaining payments that provide many of the challenges.”

Whether the trip is for a small tour operator or a large corporate event, TravelLogix™ makes the reservation process easy. Travelogix™ is equipped to handle multiple price categories, room assignments, capacity cut-offs, multi-event registrations, and accounting issues such as discount codes or automatic recurring payments.

With TravelLogix™, travel planners can easily manage any kind of group excursions. Aside from basic trip reservations, the application allows the customer to choose their specific rooms, register and pay for roommates, send out invitations, check balances, set up auto payments, and choose desired excursions. With advent of the internet and so many companies taking advantage of its versatility, many say TravelLogix™ is *the last* booking system you will ever need. One Client, Jason Beukema of Whettravel.net, emphatically states “TravelLogix’s booking system, reports, and ease of use are outstanding and there is nothing like it in the travel industry.”

TravelLogix Features:

- State-of-the-art, robust Admin area with varying access levels and complete data management
- Special tools for managing rooms, roommate switching, and trip cost/profit calculations.
- Online HTML editor, dynamic photo album, forum, ad manager & newsletter manager.
- Core components such as optional membership pricing and multiple payment management.

TravelLogix™ delivers all this at a fraction of the cost of its competitors. No longer do travel planners have to invest thousands of dollars into archaic, multi-license software systems. With no software to download, TravelLogix is a secure web-based application that can be accessed anywhere. As a customer, using it is as easy as registering, choosing a trip, and making a deposit. In addition, non-standard payment options such as electronic check and pay pal make multiple payments and paying for roommates a breeze.

For travel planners already with a web site, TravelLogix™ booking system can be seamlessly integrated. Since the software is fully brandable, visitors will not know they are using a different site. Hurry, because for a limited time, we are offering a FREE trial of their NEW Revolutionary META travel-booking engine. Its a brandable travel booking search portal that lets your company earn commissions as it scours up to 9 different travel sites such as Orbitz and Expedia! Wow, enough said, now is the time to let Travelogix propel your business.
